

PRICE LIST - Therapy using egg donation

Price valid as of April 1st, 2015

EXCLUSIVE CARE

€ 5900

The price includes

Preparation of the donor

Complex care and preparation of the donor including:

- Monitoring of donor's cycle and egg collection
- Medication for the donor
- Reimbursement of the donor
- **Multiple choice of donors - the patient chooses from three possible donor candidates which have been pre-selected according to the patient's request**

Preparation of the recipient

- Consultation with a doctor during the transfer cycle, ultrasound examination during treatment (commencement of treatment with a doctor consisting of a short consultation, an ultrasound, a probing examination, instructions regarding the Treatment Plan)
- **Complete set of medication for the period up until the pregnancy test which is sent to the recipient's address, including medication for the down-regulation**

Laboratory methods

- Testing for HIV, Hep B, C and Syphilis for the male partner at the time of the egg collection
- Detailed Sperm analysis
- Fertilization using ICSI
- **Prolonged embryo cultivation and monitoring of embryos using the EmbryoScope**
- Assisted hatching
- Embryo transfer

Other Premium Benefits

- **VIP logistical care - in the event of any unexpected logistical problems or negative reaction of the recipient (e.g. bleeding in the transfer cycle), Unica will cover any these associated costs**

Our Guarantees

- minimum of 8 - 12 ripe oocytes
- 4 - 6 embryos (depending on sperm quality)
- 76% cumulative success rate of one IVF cycle
- 4th IVF cycle free of charge if first 3 egg donation cycles are not successful

SHARED DONOR CARE

€ 3500

The price includes

Preparation of the donor

Complex care and preparation of the donor including:

- Monitoring of donor's cycle and egg collection
- Medication for the donor
- Reimbursement of the donor

note: patient shares a donor with another recipient. Recipient receives donor description in advance

note: there are usually no embryos available for vitrification in the shared donor program. In these cases, FET cycles are not an option. This treatment is recommended and suitable only for those patients with positive spermiogram results.

Preparation of the recipient

- Consultation with a doctor during the transfer cycle, ultrasound examination during treatment (commencement of treatment with a doctor consisting of a short consultation, ultrasound, probing examination, instructions regarding the Treatment Plan)

Laboratory methods

- Detailed Sperm analyses
- Fertilization using ICSI
- Assisted hatching
- Embryo transfer

Guarantee

- Minimum guarantee of 4 ripe oocytes
- Guarantee of 2 embryos when proceeding with sperm donor
- Usually 2 embryos, depending on sperm quality
- 40% success rate of one cycle (fresh egg transfer only)

The price does not include

Tests for HIV, Hep B, C and Syphilis for male partner at the time of egg collection	€ 95
